## **INLAND REGION**

### **Lane, Vegetation Fire, Tehama County**

Location: Hwy 36, Paynes Creek

Jurisdiction: State DPA, SRA, Tehama Glenn Unit

Per Cal OES Duty Officers, as of 06/23/18 at 1821 hours:

- 900 acres grass, brush and timber, 0% contained
- Structures threatened
- Threat to 500kV powerlines
- Long range spotting
- Red Flag Warning currently in effect for strong north winds and low humidity

### **Fire Management Assistance Grant (FMAG)**

- An FMAG Application Request is under consideration by the incident.

### **Evacuations**

- Mandatory Evacuation Order in effect for approximately 100 homes in the Ponderosa Sky Ranch Area
  - Notice sent through "Tehama Alert" System
  - Tehama Sheriff's Office is conducting door-to-door notifications

### **Evacuation Center**

- Evacuation Center - Mineral Elementary School at 38355 Scenic Ave., Mineral, Ca.

# **FIRE ACTIVITY**

## **INLAND REGION (Continued)**

### **Stoll, Vegetation Fire, Tehama County**

Location: Stoll Rd x Baker Rd, west of Red Bluff

Jurisdiction: State DPA, SRA, Tehama Glenn Unit

Per Cal OES Duty Officers, as of 06/23/18 at 1732 hours:

- 500 acres grass and brush, 0% contained
- Continued structure threat
- Structures threatened
- Threats to 500kV powerlines
- Evacuation in progress
- Red Flag Warning in effect for strong north winds and low humidity

### **Fire Management Assistance Grant (FMAG)**

- An FMAG Request is likely to be made from the incident.

### **Evacuations**

- Approximately 180 homes are under evacuation.

### **Critical Infrastructure**

- Power Outage: Per the PG&E Online Outage Center, there are approximately 6,000 – 7,000 services outages in the area.
  - The California State Warning Center is in contact with the California Utilities Emergency Association (CUEA) for further information.
- Per CUEA, as of 06/23/18 at 1643 hours, KV lines are secure and there are currently no impacts to the grid.

## **COASTAL REGION**

### **Pawnee, Vegetation Fire, Lake County**

Location: Pawnee Rd. x New Long Valley Rd., 4 miles NE of Clear Lake Oaks

Jurisdiction: State DPA, SRA, Sonoma,-Lake-Napa Unit

Per Cal OES Duty Officers, as of 06/23/18 at 1759 hours:

- 75 acres grass and oak woodland, 0% contained
- Dangerous rate of spread
- Structures threatened
- 98 degrees, 6% relative humidity, wind NNE at 8 mph, gusts to 16 mph

# **WEATHER SYNOPSIS BY REGION**

## **NORTHERN CALIFORNIA**

\*\*\* High Risk for Strong Gusty Winds and Low Relative Humidity Sacramento Valley/Foothills and South Portion of Mid Coast through Sunday and Eastern Bay Area through this Evening \*\*\*

\*\*\* Low Relative Humidity and Gusts to 35 mph Far East Side Late Monday \*\*\*

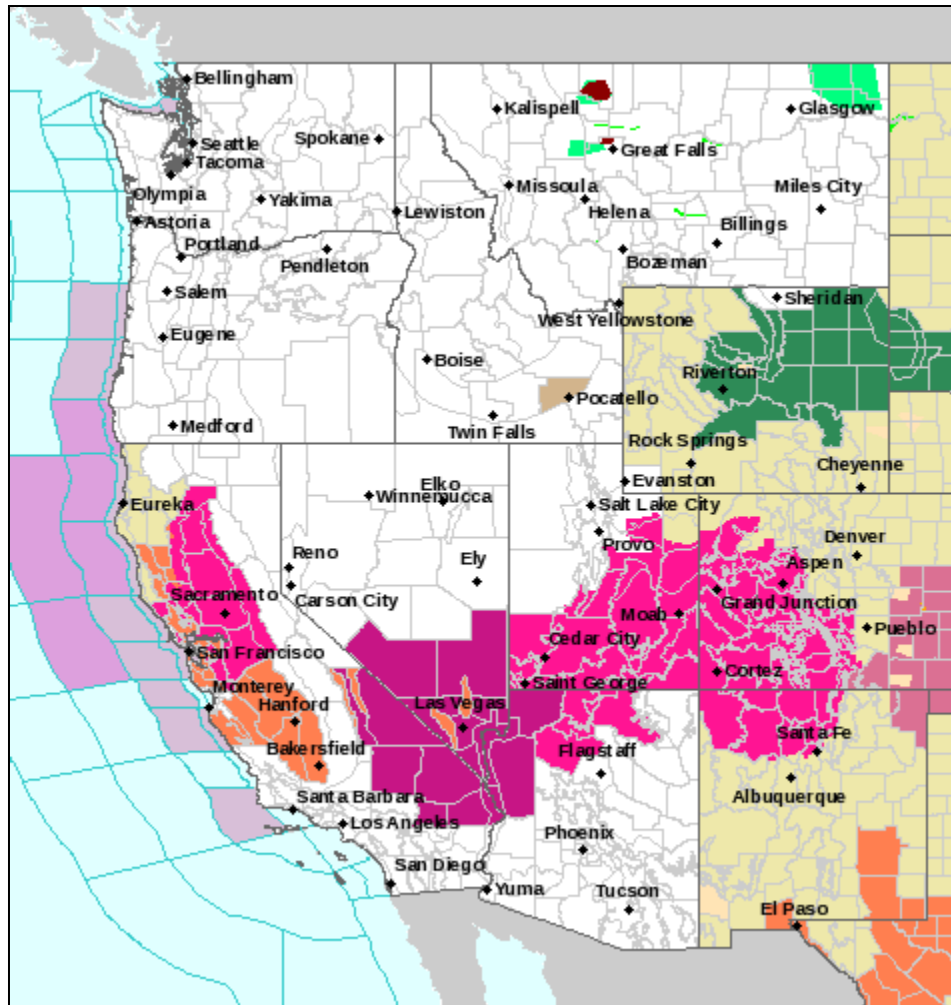

High pressure aloft will produce hot and dry weather with gusty N-NE/Offshore winds through midday Sunday. Temperatures will be 10-15 degrees above normal and relative humidity in many areas will be 5-15%. The biggest impact will be in the Sacramento Valley and surrounding foothills and the Mid Coast to the east and south of Clear Lake through midday Sunday, and in the eastern portions of the Bay Area today through this evening. Peak gusts in the affected areas will be 35-40 mph, and locally stronger. Relative humidity recovery will on be to 20-30% tonight in the affected areas. Winds will diminish late Sunday as the next Pacific low pressure trough approaches the North Coast.

The trough will move over the region Monday, and much of next week will be spent under the influence of low pressure troughing of variable strength. On Monday afternoon the trough will be deep enough to produce S-SW wind gusts to 35 mph east of the Cascade-Sierra crest with relative humidity 12-18%. Gusts will reach 25-30 mph Wednesday and possibly higher Thursday and Friday.

## **SOUTHERN CALIFORNIA**

There will be little change in the weather through Wednesday as high pressure remains over the southwestern states. Maximum temperatures will be 5 to 10 degrees above normal away from the coastal areas, with upper 70s and 80s across the mountains and 90s to 102 in the valleys. Minimum humidity will be mainly in the teens above and inland from the marine layer. The marine layer will be around 2,000 feet deep across Southern California, with morning low clouds and fog making it into most coastal valley locations. Westerly afternoon and evening winds of 15 to 25 mph with gusts to 40 mph will surface across the desert passes. A Pacific trough will drop down the West Coast bringing significant cooling and an increase in humidity to the region Thursday through next weekend. Temperatures will become below normal by Friday. This trough will also increase westerly winds through the desert passes to 20 to 30 mph with gusts to 50 mph. The marine layer will become deep, with morning low clouds and fog making it over the lower coastal mountain slopes.
